

BIKESHELFOE REPAIRS

At BikeShelfOne our qualified bike mechanics offer repairs and servicing on all bicycle brands and models. We offer a range of bike repairs from a basic tune up to get you moving again, to full bike rebuilds and race preparation. We stock a wide range of bicycle parts to get you moving again no matter what you ride.

BIKE FITTING

We also offer a range of bike fitting services to make sure you have the optimal bike fit and avoid potential injuries while riding. This is great for people who spend a lot of time in the saddle or can't seem to get comfortable on their bikes.

BIKE BUILD (FROM BOX)

If you purchase a bike from BikeShelfOne and it is delivered via courier, you will require a skilled bike mechanic to build it up for you. This includes assembly of the bike along with tuning of the gears and a complete safety check. However whenever you pick up a bike directly from us it will be safe and ready to ride! We can also fit additional parts and accessories as a part of the bike build or as a separate service.
